Summary of the test results:

The present members of the PROPERTY PROTECTION AND DAMAGE PREVENTION COMMITTEE OF THE ASSOCIATION OF HUNGARIAN INSURANCE COMPANIES (hereinafter referred to as: MABISZ VKB) have studied the submitted documents, have investigated the characteristics and technical parameters of the presented modular safety deposit vault panels, vault room doors and fire resistant boxes, they have examined their construction and surveyed the stipulations of MABISZ recommendation elaborated for storing of valuables as well as listened to the expert's opinion.

Insurer's conditions of risk assumption:

- The deposit vault boxes are **operated** with two-bin key or three disc figure combination lock, with two-bin **emergency opening** possibility ;
- Inside the door or the cover of the deposit vault box there should be placed a **marking** suitable for individual identification, including the following:
 - Name and identification of the manufacturer;
 - Name of the standard and the achieved security degree;
 - Year of manufacture;
 - Type and serial number of the product;
- In case of **plate safety cabinet, furniture safe** (category A-D) fixing to the supporting element of the building structure resisting 5 000 N (500 kg) fastening force;
- In case of **safe** (category E-O) fixing to the supporting element of the building structure resisting 10 000 N (1 000 kg) fastening force
- In case of professional connecting to **electronic signalling system** (opening sensor, body noise and drilling sensor), the limit of insurer's risk assumption is double for the deposit vault boxes of categories A–G; from category I professional connection to the electronic signalling system is obligatory;
- Observation and certification of the **installation** instructions described by the manufacturer, or other equivalent technical solutions accepted by MABISZ;
- Marking of the installed products: x= in case of products with individual dimensions the installer has to write the exact dimensions;
- The current table of „Risk assumption limits for deposit vault boxes recommended for the insurers” makes an integral part of the Product appropriateness recommendation of MABISZ.
